

Bob Shellard

Session 1: Sprayer Calibration

- Single nozzle: Using the 1/128th method
- Multiple nozzle: Using the 1/128 method as well as the refill method
- Boomless jets: Using the refill method, as well as the capture method
- Discuss variables (pressure, speed, air temp, min. water requirements by label..)

Session 2: Herbicide Labels or Application timing

Discuss important label topics

- RUP's ,
- PPE,
- Herbicide application rates,
- Total mixture volumes,
- Re-entry intervals,
- Record keeping,
- Application site restrictions

Discuss Application Timing

- Based on label reference,
- Based on plant life-cycle,
- Based on plant-back intervals,
- Based on ground disturbance, both pre and post-treatment
- Emphasize land use goals and long-term planning efforts
