

# Craig Florence

## Irrigation Best Practices

We will cover best practices for both PVC and HDPE (polyethylene) pipe and fittings. We will go over proper solvent welding procedures, dealing with threaded connections, swing joint failures, and different kinds of failures regarding PVC pipe and fittings. We will cover fusion processes for HDPE (butt fusion, socket fusion, and electrofusion). This will encompass both new installations as well as repairs.

**Biography** -Craig Florence is Vice President of The Dillon Company in Denver. He has been with The Dillon Company for 30 years, and in the water industry for over 35.

Craig has been involved with many manufacturers and their wide variety of products in his technical and sales endeavors.

Craig has taught educational seminars on Backflow Prevention, Confined Space Alternatives, Control Valves, Filters, and Plastic Pipe and Fittings as well as many training sessions for contractors, engineers, and wholesalers.
