

## **Plants Tough Enough for Street Medians by Plant Select®**

Plant Select® promotes 149 plants in its program; about half are selections of regionally native plants. This presentation will describe Plant Select® trees, shrubs and perennials suited for street medians that are low maintenance and can represent a Wyoming styled landscape. We will also discuss irrigation options and water scheduling. The goal of this presentation is to investigate better solutions for successful plantings of medians in our Steppe climate.
